BIOSIS (**www.biosis.org**), established in 1926, is a non-profit organization that delivers highly acclaimed information services – including databases and customized information products – to the global life sciences community. Database products include ***BIOSIS Previews®***, ***Biological Abstracts®***, ***Biological Abstracts/RRM® (Reports, Reviews, Meetings)***, and ***Zoological Record***.

Abstracts of Mycology (ISSN: 0001-3617) is published monthly by BIOSIS®. POSTMASTER: address service requested

SUBSCRIPTION RATES: Annual rate with Cumulative Index $725. ***BIOSIS Serial Sources***: Annual rate $150.

CHANGE OF ADDRESS: To facilitate address changes, subscribers are requested to send former mailing address (enclose recent mailing label, if possible) and new mailing address with mailing code. Changes of address and subscription inquiries should be directed to BIOSIS Customer Services (see address above).

Copyright® Biological Abstracts, Inc. (BIOSIS) 2003. All rights reserved. No part of this publication may be reproduced in hard copy, machine-readable or other form without advance written permission from BIOSIS. Information has been obtained by BIOSIS from public sources believed to be reliable. BIOSIS makes a diligent effort to provide complete and accurate representation of the bioscientific literature in its publications and services. However, BIOSIS does not guarantee the accuracy, adequacy, or completeness of any information and BIOSIS MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. BIOSIS disclaims all liability for errors or omissions that may exist and shall not be liable for any incidental, consequential or other damages (whether resulting from negligence or otherwise) including, without limitation, exemplary damages or lost profits arising out of or in connection with the use of this publication. Errors or omissions may be reported to Biological Abstracts, Inc., Two Commerce Square, 2001 Market Street, Suite 700, Philadelphia, PA 19103-7095 USA.

BIOSIS® is a registered trademark of Biological Abstracts, Inc.

ABSTRACTS OF MYCOLOGY contains entries of pure and applied research studies involving fungi, lichens, and fungicides. Reviews and meetings also may be included.

ABSTRACTS OF MYCOLOGY encompasses the following research areas:

- Agronomy
- Air Pollution
- Allergy
- Biological Control
- Chemotherapy (Antifungal Agents)
- Cytology
- Ecology
- Food, Industrial Microbiology
- Forestry
- Genetics
- Immunology
- Medical, Clinical Microbiology (Mycology)
- Neoplasms
- Pharmaceutical Botany
- Plant Biochemistry
- Plant Biophysics
- Plant Disease Caused by Fungi
- Plant Morphology
- Plant Physiology
- Public Health
- Radiation Biology
- Soil Microbiology
- Systematics
- Toxicology

Three indexes are included: Author (personal and corporate author names), Organism (taxonomic names), and Subject (specific words).

CHIEF OPERATING OFFICER and
CHIEF FINANCIAL OFFICER

Linda R. Sacks
Sr. Vice President
PRODUCT DEVELOPMENT
AND MARKETING

CUMULATIVE AUTHOR INDEX

Uses

The Author Index is used to locate entries when specific personal or corporate author names are known.

Features

The Author Index is an alphabetically ordered listing of personal and corporate author names. For each author or coauthor cited, a separate entry is created. Each name is followed by the reference number(s) of the item(s).

AUTHOR INDEX (Personal or Corporate Names)

Name	Ref. No.
Adams Research Study Group	2468
Glanzman, David L.	9890
Hempel, Arnold T., Jr.	1256
Malereau, Marie-Pierre	334
McDermott, J. R.	10323
Murphy, Geoffrey G.	9890

Special Features

Personal Names:

- Family names are followed by the first name (if provided) and any initials and patronyms given in the original item.*
- Prefixes such as De, La, Van, or Von are followed by a space if listed as such in the original publication (e.g., De Ville).
- Family names with O', M', Mc, or Mac have no space (e.g., McClellan).
- Family hierarchy (Sr., Jr., I, II, or III) notations follow the initials (e.g., Simpson, J., Sr.).
- Hyphens and spaces are retained as in the original (e.g., Smith-Jones).
- Titles are omitted unless a personal name is not given in the original source (e.g., Lord Mountbatten).

Corporate Names:

- When a corporate body is the only source indicated in the original item, it is used in the Author Index. A geographic location is given in cases where the corporate name is ambiguous.
- Acronyms are listed without spaces between the letters (e.g., WHO).

How to Search

1. Select the name to be searched. Check all variants.
2. Locate personal or corporate name in alphabetical position.
3. Use reference numbers to find individual entries.

*Additional information on BIOSIS' treatment of author names can be found in the "Editorial Policies" section of the ***BIOSIS Search Guide***.

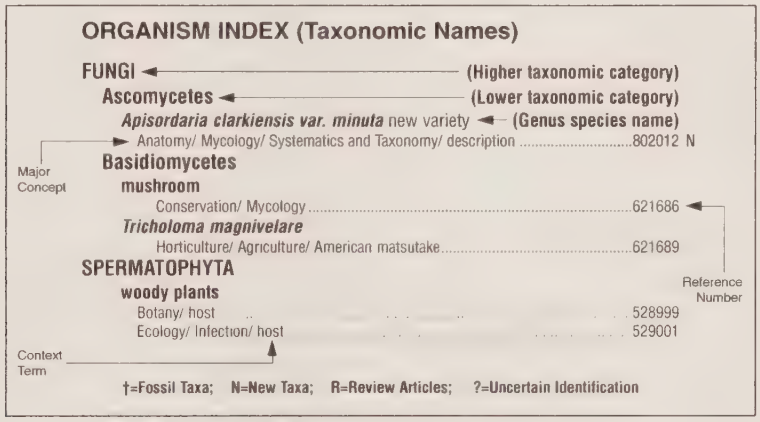
CUMULATIVE ORGANISM INDEX

Uses

The ORGANISM INDEX is used to find entries by taxonomic category. It provides hierarchical access to taxonomic names for locating references to related organisms. Entries are arranged according to BIOSIS' taxonomic hierarchy and consist of common, cell line, virus, and scientific organism names. Within each entry, items appear with their related Major Concepts and additional context terms. These terms will identify additional details, developmental stages, or roles among organisms, such as predator, prey, and animal models to clarify the emphasis and relationship in the original document.

Features

- The Organism Index is arranged hierarchically from broad to narrow groupings according to the taxonomic classification shown in the Major Taxonomic Classifications list on page Org-ii. Within a higher classification (e.g., **FUNGI**), more specific taxonomic levels (e.g., **Basidiomycetes**) may be listed. Organism names are placed within the hierarchy at their lowest level.
- Genus species names (italicized) also appear alphabetically in the Subject Index and include the related BIOSIS taxonomic category for easy entry into the Organism Index.
- Each entry is followed by Major Concepts and additional context terms where they apply.
- When appropriate, modifiers for Review Article (R), New Taxa (N), and Fossil Taxa (†) appear in the right margin following the reference number.
- A question mark (?) following an organism name indicates uncertain identification.
- Some organisms are indexed to more than one taxonomic category; for example, myxomycetes are indexed under both **Fungi** and **Protozoa**.



How to Search

1. Consult the Major Taxonomic Classifications list on page Org-ii. If you are searching a genus species name and are unsure of its higher taxonomic classification, consult the Subject Index.
2. Find appropriate higher and lower taxonomic categories.
3. Note Major Concept and additional context terms.
4. Note modifiers for new taxonomic or fossil information.
5. Use reference numbers to find individual entries.

MAJOR TAXONOMIC CLASSIFICATIONS

Major taxa appear in the index in the order given below. Many are subdivided alphabetically into lower-level taxa, which appear in the index only if there are references.

ORGANISMS
MICROORGANISMS
VIRUSES
  Animal Viruses
  Bacterial Viruses
  Plant Viruses
BACTERIA
EUBACTERIA
  Spirochetes
  Aerobic Helical or Vibrioid Gram-Negatives
